The book "UFOs, Area-51, and Government Informants." is now available

<https://www.createspace.com/4129050>

The book will also be available in Canada, the U.K., and Europe.

The book is a detailed analysis of a number of government UFO leaks that have occurred which give a glimpse of what has occurred inside the classified government world of UFO investigation, and how the U.S. government has gradually disclosed key elements of the UFO story into the public.

Topics of discussion in this interview will include the early days of flying saucer investigation in Canada and how that work led to a key U.S. official, Dr. Eric Walker, who was there when the cover-up began and understood why the cover-up needed to continue. The interview will also look behind the story of the MJ-12 document that dominated discussion in the UFO world in the late 1980s, and a group of high level government officials who were behind the release of this document.

The interview will discuss four key US government intelligence operations which were carried out to get out the truth about UFOs but contain the classified aspects needed for reasons of national security. These four events were 1) The UFO documentary in 1975 called UFOs, Past Present, and Future 2) The television show UFO Cover-up? Live ! broadcast in October 1988 3) The Area-51 story that broke on KLAS-TV in the spring of 1989 4) The release of 4,000+ pages of MJ-12 related documents.
